Web Application Development

Food Order Management System

Lahori Zaiqa --- Food Order Management System

Developed a full-stack Food Order Management System for a restaurant named Lahori Zaiqa. The system streamlines the entire food ordering workflow, from customer order placement to admin management.

Tech Stack: PHP · MySQL · HTML · CSS

Data Science

Real Time Traffic Prediction

The project focuses on predicting real-time traffic intensity by analyzing traffic-related data using machine learning techniques. It helps estimate congestion levels accurately, enabling better traffic management and smarter decision-making for urban transportation systems.
